MONTANA

RESOURCE GUIDE

TO

LOCAL LAW ENFORCEMENT

APPLICATIONS

OF

PERSONAL COMPUTERS

INTRODUCTION

A questionnaire about the use of personal computers was sent to all Sheriffs and Police Chiefs in Montana in March, 1992. The objective of this survey was to find out which agencies had PC's, what their capabilities were, what kinds of training was desired, and how were the PC's being used.

One of the questions asked users about the use of specific law enforcement applications. A number of agencies indicated that they were indeed using their computers in these areas. Others, at the same time, indicated a desire to learn more about these applications and their possible adaption within their own agency.

This directory is aimed at those people who are interested in obtaining information about the various software applications available for law enforcement. It is suggested that if you are interested in a specific law enforcement

application for your PC, you should contact a few of the agencies listed within this directory who have indicated they already possess this capability.

The Board of Crime Control has developed three applications which are available to agencies at no charge. These are: the MUCR/NIBRS Local Management Information System, The Master Name Index System, and a Scheduling Program. If you are interested in any of these packages, please contact one of the staff persons listed in this directory.

The MUCR Program at the Montana Board of Crime Control has developed and distributed a MUCR/NIBRS program for use on CJIN terminals and Personal Computers. This program gives local agencies the capability to generate management reports and crime statistics on demand. For further information about this program, contact Bob Liffring or Dara Smith at 444-3604.

*Agencies which use computer software different from the NIBRS program distributed by the Montana Board of Crime Control.
